

As American businesses begin to open again, it is important we continue to help slow the spread of COVID-19 and keep members of our communities healthy and safe. Wearing a cloth face covering, practicing social distancing, and washing your hands are good practices that will continue to protect us and our neighbors as our economy reopens.

The Department of Health and Human Services (HHS) is streamlining the process for ordering face coverings by enabling organizations, private businesses, and local and state governments to order directly through an [established website](#). The attached document provides information about the face coverings and explains the automated ordering process. Orders that are received through the existing process will continue to be fulfilled as they are received.

Orders will be processed until supplies are depleted. You will be notified if HHS is unable to fulfill your request. If you have any questions or concerns about your order please email facecoverhhsaspr@hhs.gov.
